IBM Storwize V5000

Outstanding storage with greater flexibility—for midsized businesses

Is your company challenged by an explosion of data and shrinking budgets?

In a 451 Research 2013 storage study[1]:

47% considered capacity growth as their first storage concern

21% considered the high cost of storage as their first concern

20% considered performance to be their first concern
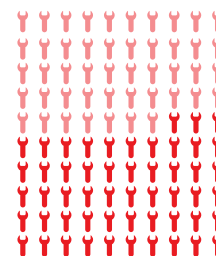

IBM Storwize® V5000 can help:

20% less cost

Get a customizable, powerful, and highly reliable Storwize system for 20% less[2]

30% less capacity growth

Experience 30% less capacity growth with external virtualization

47% management reduction

Reduce your management effort by 47% with advanced GUI[3]

Software-defined storage: great flexibility, high performance and availability with a virtualized storage infrastructure
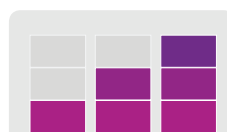

Flexibility

Start quickly and add value by customizing your system to your precise requirements

Performance

Optimize network utilization for mirroring over IP with Bridgeworks SANSlide technology

3x performance with as little as 5% capacity on flash

Availability

99999

Reach 99.999% of availability with innovative and reliable Storwize architecture
